or scan the QR Code

Incidents that involve animals trapped in Flood and Swiftwater require special considerations and knowledge. This training is provided through both hands-on and classroom instruction. This class covers ASAR Swiftwater Technician skills with a 2-hour virtual classroom session before we meet in person. Small animal rescue techniques will be the primary focus, with additional discussion about large animal issues and hazards in floodwater. Participants need to have the ability to swim in moving water conditions. Participants will need to bring a mask or face covering to wear when not in the water. In addition, participants will be temperature screened daily; and should not participate in training if they are not feeling well or have tested positive for Covid -19 within 14 days of this training.

Class \$450.00 Drysuit Rental \$200.00  
Class size limited to 25 people
