

ASAR Urban High Angle Ropes Intro to Collapsed Structure/ Confined Space

May 9th-14th, 2022

**Michigan Humane
7887 Chrysler Drive
Detroit, MI 48211**

Course Description

This class is limited to 30 participants.

This customized combination training hits many topics needed for Type 1 ASAR teams. Training is provided through both hands-on and classroom instruction with primarily a small animal focus. Attendees must have working knowledge of low angle ropes, knots, anchors, and mechanical advantage. Instructors will review low angle ropes briefly and then quickly into high angle rope rescue considerations. In addition, we will be adding the ASAR introduction to collapsed structure and confined space into this 6-day training. Participants will need to provide proper PPE for this training (see list below).

Course Topics

Hazard identification
Review of low angle ropes
Knots/mechanical advantage
Raising and lowering techniques
Animal restraint/harnessing
Anchors and AHD use
Intro to collapsed structure and shoring.
Scene assessments
Intro to confined space hazards with focus on urban applications
PLUS, MUCH MORE!

LUNCH ON YOUR OWN
